Remembering that 1/125 second will “freeze” a person walking with a normal lens is a great starting point for setting shutter speeds for a variety of subjects.

Stop the presses – keep your finger on the shutter | L ...
Lastly – don’t press the shutter with the very tip of your finger – rather use the flat part of it so that the end section of your finger is almost horizontal at the time of releasing the shutter (as pictured). This will help you to have as much control as possible and will also reduce camera shake.

A finger on the shutter : a sharpshooter's guide to action ...
This camera has an angled shutter release on the front of the body, which was perfect for the middle finger, and left the index finger free to operate the metering switch. The middle finger release felt very natural on this camera, but I haven't felt comfortable using it on any camera with a shutter release on the top plate.

Do you use your middle finger to press the shutter release ...
Last fall Wes bought some spring flowering bulbs from Jessica, who was selling them as a senior class fundraiser. I can't believe she's already a senior, but that's a whole other story (or maybe blog post) . He planted the bulbs along our front walk and, as usual, we hoped for the best. The...

Photographs show a cactus vent cover resembling an extended middle finger installed by a homeowner to get back at his neighbors. Read the story below before you look at the pictures. This is a ...

Does a Cactus Vent Cover Display a ‘Middle Finger’?
Architecture at its finest This is a true story. It happened in Utah and was on the news! A city councilman, Mark Easton, lives in this neighborhood. He had a beautiful view of the east mountains, until a new neighbor purchased the lot below his house and built. Apparently, the new home was 18 inches higher than the ordinances

house - The Middle Finger
Now you're in bulb mode. This means the camera will keep taking a picture until your finger comes off the shutter button. Bulb mode is mostly used for long exposures at night. The main advantage is that it allows the photographer to achieve shutter speeds longer than the 30 seconds (displayed 30” on the camera) that is allowed on most DSLRs.
What is Bulb Mode and 5 Ways to Use It (Long Exposure ... 
Shutter Release - Press down or Roll. Thus defeating the purpose. That then leaves placing the pad of the end joint (distal phalange) of your trigger finger on the button in such a manner as the second joint (medial phalange) is flush against the camera body—rather than arched away from the camera.

The camera automatically adjusts the shutter speed. The range of possible f-stops depends on your lens and, with most zoom lenses, on the zoom position (focal length) of the lens. For the 18–135mm kit lens, for example, you can select apertures from f/3.5 to f/22 when zoomed to the shortest focal length (18mm).

Most of the same principles for skittish subjects apply here. But, we would like to reiterate a point that this article opened up with- You need a remote shutter release in your bag. We also stated that an it can open doors of creativity for you that would otherwise be unavailable.

Why You Need a Remote Shutter Release in Your Bag 
Shutter (photography) A shutter of variable speed is used to control exposure time of the film. The shutter is constructed so that it automatically closes after a certain required time interval. The speed of the shutter is controlled by a ring outside the camera, on which various timings are marked.
