UCLA is one of the top-ranked economics departments in the world. We have a young and active faculty whose research is shaping policy and informing the public on critical issues affecting the United States and the world.

About the Department | UCLA Economics
Information economics or the economics of information is a branch of microeconomic theory that studies how information and information systems affect an economy and economic decisions. Information has special characteristics: It is easy to create but hard to trust. It is easy to spread but hard to control.

Health economics is a branch of economics concerned with issues related to efficiency, effectiveness, value and behavior in the production and consumption of health and healthcare. In broad terms, health economists study the functioning of healthcare systems and health-affecting behaviors such as smoking. A seminal 1963 article by Kenneth Arrow, often credited with giving rise to health ...
