“Gendered Innovations” means employing methods of sex and gender analysis as a resource to create new knowledge and stimulate novel design. The term was coined by Londa Schiebinger in 2005. This website features state-of-the-art “Methods of Sex and Gender Analysis” for basic and applied research. We illustrate how to apply these methods in case studies.

Quia Web allows users to create and share online educational activities in dozens of subjects, including Speech and Language Therapy.

Quia - Speech Therapy
Speech synthesis is the artificial production of human speech. A computer system used for this purpose is called a speech computer or speech synthesizer, and can be implemented in software or hardware products. A text-to-speech (TTS) system converts normal language text into speech; other systems render symbolic linguistic representations like phonetic transcriptions into speech.
