Amazon Basin Plant Life Wildlife
The Amazon contains millions of species, most of them still undescribed, and some of the world's most unusual wildlife. It is one of Earth's last refuges for jaguars, harpy eagles and pink dolphins, and home to thousands of birds and butterflies.

Amazon | Places | WWF - World Wildlife Fund
The Amazon Basin is the part of South America drained by the Amazon River and its tributaries. The Amazon drainage basin covers an area of about 6,300,000 km² (2,400,000 sq mi), or about 35.5 percent that of the South American continent. It is located in the countries of Bolivia, Brazil, Colombia, Ecuador, Guyana, Peru, Suriname and Venezuela. Most of the basin is covered by the Amazon ...

Amazon River - Animal life: To give a succinct overview of the complete fauna of Amazonia is as impossible as it is to adequately describe the great diversity of its flora; in part this is because many of the region's species have yet to be identified. The rivers and streams of the basin teem with life, and the forest canopy resonates with the cries of birds and monkeys and the whine of insects.

Amazon River - Animal life | Britannica.com
To date, at least 40,000 plant species, 427 mammals (e.g. jaguar, anteater and giant otter), 1,300 birds (e.g. harpy eagle, toucan and hoatzin), 378 reptiles (e.g. boa), more than 400 amphibians (e.g. dart poison frog) and around 3,000 freshwater fishes including the piranha have been found in the Amazon. These numbers are dwarfed by estimates for the smaller life forms: just in Brazil ...

Brazil-nut tree. The Brazil-nut tree (Bertholletia excelsa) is a common tree species which rises above the canopy, reaching 40m. Yellow flowers grow on it, which eventually turn into large fruits, containing between 1 and 2 dozen seeds. Nuts are contained in large woody rounded pods that break open when they fall on the forest floor.

Amazon plants and trees | WWF
The wildlife of Brazil comprises all naturally occurring animals, fungi and plants in the South American country. Home to 60% of the Amazon Rainforest, which accounts for approximately one-tenth of all species in the world, Brazil is considered to have the greatest biodiversity of any country on the planet.

Wildlife of Brazil - Wikipedia
