An item may be organized in one set, several sets, or no sets at all. In the example above, it is conceivable that an individual item is organized in both subject and institution:florida.A harvester should not assume that harvesting every set in a repository will retrieve metadata from all items in the repository. Items may also be assigned to interior nodes in the set hierarchy.

Open Archives Initiative - Protocol for Metadata ...
A transition economy or transitional economy is an economy which is changing from a centrally planned economy to a market economy. Transition economies undergo a set of structural transformations intended to develop market-based institutions. These include economic liberalization, where prices are set by market forces rather than by a central planning organization.
